

DRILL STEM TEST

DST 3097-3125 Queens, 2 packers, 5/8" x 1" chokes, open 1 hour, No WC, Gas to surface
2 min. 3100 MCF/day, mud in 6 min., no oil or water, no recovery, dry gas, SFP 320#
BHFP 100-855#, 15 min. 3-I BHFP 1055#, NH 1685# in and out.

DEVIATION SURVEY

<u>DEPTH</u>	<u>OFF VERTICAL</u>
2005	1-1/2
2720	1
3011	3/4

1. Introduction

The purpose of this study is to investigate the effects of the proposed system on the performance of the system. The study is divided into two parts: a theoretical analysis and an experimental evaluation. The theoretical analysis is based on the principles of the system and the experimental evaluation is based on the results of the experiments.

2. Theoretical Analysis

The theoretical analysis is based on the principles of the system and the experimental evaluation is based on the results of the experiments.

The theoretical analysis is based on the principles of the system and the experimental evaluation is based on the results of the experiments.

The theoretical analysis is based on the principles of the system and the experimental evaluation is based on the results of the experiments.
