

NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELL

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-offs, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL	X	REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF CASING SHUT-OFF		REPORT ON DEEPENING WELL

Oil & Gas Inspector

Title

THEORY OF THE EARTH AND ITS HISTORY

CHAPTER I. THE EARTH AND ITS HISTORY

The Earth is a sphere, and its history is the history of the changes which have taken place in its form and position since its origin. The history of the Earth is divided into two main periods, the primary and the secondary. The primary period is the period of the formation of the Earth, and the secondary period is the period of the changes which have taken place since its formation.

The primary period is the period of the formation of the Earth, and it is divided into three main stages. The first stage is the period of the formation of the Earth from the nebula, and the second stage is the period of the formation of the crust. The third stage is the period of the formation of the interior of the Earth. The secondary period is the period of the changes which have taken place since the formation of the Earth, and it is divided into two main stages. The first stage is the period of the formation of the continents, and the second stage is the period of the formation of the oceans.
