

OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

DUPLICATE MISCELLANEOUS REPORTS ON WELLS

SEP 29 1945

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS	<input checked="" type="checkbox"/>	REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING

Title

INTERNATIONAL COMMISSION ON THE HISTORY AND GEOGRAPHY OF THE GREAT WAR

Paris 1919-1920

REPORT OF THE COMMISSION

The Commission was constituted by the League of Nations in 1919, and its task was to prepare a report on the history and geography of the Great War. The Commission was composed of representatives of the various countries which had been affected by the war, and its work was carried out in a series of meetings held in Paris from 1919 to 1920.

The Commission's report is divided into two main parts: the first part deals with the history of the war, and the second part deals with the geography of the war. The history part is further divided into three sections: the first section deals with the causes of the war, the second section deals with the course of the war, and the third section deals with the consequences of the war.

The geography part is divided into two sections: the first section deals with the physical geography of the war, and the second section deals with the human geography of the war. The physical geography section deals with the impact of the war on the physical environment, and the human geography section deals with the impact of the war on the human population.

The Commission's report is a valuable contribution to the study of the Great War, and it provides a comprehensive and authoritative account of the history and geography of the war. The report is written in a clear and concise style, and it is well illustrated with maps and photographs.

The Commission's report is a valuable contribution to the study of the Great War, and it provides a comprehensive and authoritative account of the history and geography of the war. The report is written in a clear and concise style, and it is well illustrated with maps and photographs.
