(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

September 6, 1957

Federal "X" Lease

Well No. 1-19 is located 660 ft. from N line and 1890.24 ft. from W line of sec. 19

NE/4 NW/4 Sec. 19 13S 31E N.M.P.M.  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

Wilcat Chaves New Mexico  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is \* ft.

### DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

\* The elevation will be supplied as soon as I receive it.

I am planning to drill a 3750' San Andres test using combination tools. We will rotate to the top of the Anhydrite and cable tool from there to total depth. Surface will be 120' of 13 3/8", cemented with 25 sacks. 10 3/4" will be mudded in the top of the Anhydrite at approximately 950'. Should it prove necessary, 8 5/8" or 7" will be run thru the Queen Sand at approximately 2500'.

If needed a 5 1/2" production string will be cemented in the San Andres dolomite at approximately 3700' with 100 sacks.

All casing will be run and cemented, using methods approved by the U. S. Geological Survey.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
