NOTICE OF INTENTION TO ABANDON WELL.....	

(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

Well No. 4-34 is located 1,300 ft. from N line and 600 ft. from E line of sec. 34  
13 South 01 East 100.000  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)  
Albuquerque New Mexico  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 4420 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

I propose to drill this well to a depth of 3065 feet, with rotary to be used to a depth of 1420 feet, and cable tools from that point to total depth.  
Surface casing, 13-5/8", will be run to a depth of 410 feet and a sufficient amount of cement will be used to circulate to the surface. It is estimated that 225 sacks will be used on the surface string.  
An intermediate string, 8-5/8", will be run to a depth of 1420 feet, set through the red beds in to sandgravel, and mudded. This pipe will be pulled after the oil string is set.  
The oil string, 5-1/2", will be run to a depth of 3065 feet and be cemented with 100 sacks.  
All casing run and cemented will conform with the regulations set out by the Geological Survey.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
