Well No. **6** is located **660** ft. from **N** line and **660** ft. from **E** line of sec. **3**
SE SE 3 **14-S** **31-E** **NMPH**
(¼ Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Caprock Queen **Chaves** **New Mexico**
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is **4415** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Approval has been received from the New Mexico Oil Conservation Commission to install a pilot water flood in the Caprock Queen Pool, Sections 3 and 10, 14-S, 31-E Chaves County, New Mexico. It is proposed to convert four wells on the Government "B" Lease to water injection wells.

It is requested that permission be granted to convert Well No. 6 to a water injection well. It is believed that the application of water flood to this lease will result in a substantial increase in production in a reasonable length of time as well as an increase in the ultimate recovery.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
