LOG OF OIL OR GAS WELL

A blank sheet of graph paper featuring a uniform grid of squares. The grid consists of approximately 10 columns and 8 rows of squares, defined by thin black lines on a white background. The grid covers most of the page, leaving small margins at the top, bottom, and sides.

The information given herewith is a complete and correct record of the well and all work done thereon so far as can be determined from all available records.

IMPORTANT WATER SAMPLE

[illegible]

00001-00000

[illegible]

It is of the greatest importance to have a complete history of the well. Please state in detail the dates of redrilling, together with the reasons for the work and its results. If there were any changes made in the casing, state fully, and if any casing was "detached" or left in the well, give its size and location. If the well has been dynamited, give date, size, position, and number of shots. If plugs or bridges were put in to test for water, state kind of material used, position, and results of pumping or bailing.
