Trigg Federal Lease

Well No. 9-4 is located 664.75 ft. from N line and 660 ft. from E line of sec. 4

Range 14 South (Twp.) 31 East (Range) N.M. (Meridian)

Brickley Queen (Field) Chaves (County or Subdivision) New Mexico (State or Territory)

The elevation of the derrick floor above sea level is 4240 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

I propose to drill this well to a depth of 2865, with rotary being used to a depth of 1150 feet, and cable tools from that point on to total depth.

Surface casing, 13-3/8ths, will be run to a depth of 130 feet, and cemented with 50 sacks.

Intermediate string, 8-5/8ths, will be run to a depth of 1150 feet, mudded, and pulled after the oil string has been cemented.

Oil string, 5-1/2, will be run to a depth of 2840 feet and cemented with 100 sacks.

All casing run and cemented will conform with the regulations set out by the Geological Survey.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
