NOTICE OF INTENTION TO PULL OR ALTER CASING	SUPPLEMENTARY WELL HISTORY
NOTICE OF INTENTION TO ABANDON WELL	Report of Conversion to Water Injection

(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

Federal Trigg _____ January 20 _____, 19 61
 Water Injection
 Well No. 23-4 is located 1989.5 ft. from ~~(N)~~ line and 2310 ft. from ~~(E)~~ line of sec. 4
 Unit F Section 4 14-S 31-E NMP-M
 (1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
 Caprock Queen Chaves County New Mexico
 (Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 4175 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

Due to a substantial increase in production by an offset well, this well has been converted to water injection.

Well service unit was rigged up November 21, 1960 and sucker rods and tubing were pulled. Well bore was cleaned out to total depth.

We ran 2,513.47' of new 2-3/8" SUE 8rd. thd. 4.7# J-55 Cement Lined tubing with a 5 1/2" Halliburton R-3 packer. Packer is set at 2,513'.

Anulus was pressured to 1000#, packer is not leaking.

An injection rate of approximately 350 barrels per day has been established since well was put on injection November 27, 1960.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
