Trigg Federal Lease
Well No. 17-9 is located 610 ft. from SW line and 1250 ft. from Ex line of sec. 2
C SE SW Sec. 9 14 South 31 East N.M.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Drickey Queen (Extension) Pool Chaves New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 4151.7 (GI) ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

I propose to drill this well to a depth of 3815 feet, with rotary to be used to a depth of 1115 feet, and cable tools from that point to total depth. Surface casing, 13-3/8", will be run to a depth of 100 feet, set in the red beds, and cemented with 10 sacks. Intermediate casing 8-5/8", will be run through the red beds to a depth of 1115 feet, set in anhydrite, and mudded. Oil string, 5 1/2", will be run to a depth of 2790', set in the caprock, and cemented with 100 sacks. All casing run and set and cemented will be under methods approved by the Geological Survey.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
