Federal Trigg Lease
Well No. 17-9 is located 1280 ft. from N line and 1081 ft. from W line of sec. 9
14-5 Sec. 9 (1/4 Sec. and Sec. No.) 14-5 (Twp.) 31-1 (Range) 10-1 (Meridian)
aprock Queen (Field) Mayes (County or Subdivision) New Mexico (State or Territory)

The elevation of the derrick floor above sea level is 4162 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

I plan to drill a 2800' Queen sand well, using rotary to approximately 2755', and cable tools from there to total depth.

4-5/8" surface casing will be run to 100' and cemented with 50 sacks. This should give circulation to surface.

The 5 1/2" oil string will be cemented in the anhydrite & prock above the Queen sand at approximately 2765' with 100 sacks.

All casing will be run and cemented using methods approved by the U.S. Geological Survey.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
