(Meridian)

Caprock Queen

(Field)

Chaves

(County or Subdivision)

New Mexico

(State or Territory)

The elevation of the derrick floor above sea level is **4144** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

I plan to drill a 2800' Queen sand test, using rotary tools.

8 5/8" surface casing will be run to approximately 100' and cemented with 50 sacks.

A 4 1/2" production string will be cemented through the pay sand with sufficient cement to circulate.

All casing will be run and cemented under methods approved by the U. S. Geological Survey.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
