DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is proposed to drill this well to an approximate total depth of 3000' in the Queen Sand.

Size of Casing	Weight Per Foot	Depth	Cement
8 5/8" OD	22.7	300'	cement-circulate
5 1/2" OD	14.5	300'	300 sacks and ahead of cement

This amended application filed as this well is to be drilled with rotary tools instead of cable tools, therefore the casing program is changed. The "Well Location Survey Plat" filed with original application dated July 16, 1954 will apply as the location is unchanged.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
