The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

12-3/4" casing will be set at approximately 275' and cemented with sufficient amount to circulate back to the surface behind the pipe. 7" casing will be set at approximately 3000' cemented with 125 sacks and the plug drilled in 48 hours. (after testing). Survey plat will be furnished prior to commencement of drilling operations.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
