Union Federal
Well No. 5 is located 660 ft. from XX line and 990 ft. from E line of sec. 15
SE/4 SE/4 14-S 31-E NMPM
($\frac{1}{4}$ Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Drickey-Queen Chaves New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This is to be a test of the Queen Sand at approximately 3,000'. 12-3/4" (45#) casing will be set at approximately 300' and cemented with sufficient cement to circulate back to the surface, outside casing. 7" (20#) casing will be set at approximately 3,000' on top of sand and cemented with 125 sacks. Plug will be tested after 48 hours and if found to be OK, it will be drilled.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
