DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This will be a Queen Sand test. 12-3/4" casing will be set approximately 175' in the red beds and cement circulated back to surface behind the pipe. 7" casing will be set at the top of the pay and cemented with 125 sacks. After 48 hours plug will be tested and drilled out if found to be ok.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
