DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill about 100 feet of 11" hole and set 300' of 6-5/8" casing. We then will drill to approximately 1100 and approximately 25' of sand formation. If we are successful and enter commercial production we will set 5-1/2" casing at total depth and perforate productive zone.

Name of well: Federal-Rhodes # 1
