RE: Mona Federal #3  
Sec. 17, T-8S, R-33E  
Chaves County, New Mexico

*MM-0174830A*

Gentlemen:

This letter will serve as Hondo Oil and Gas Company's application for approval on the method of water disposal for the above captioned well.

The Mona Federal #3 produces approximately 5 barrels of water per day which is pumped to a nearby Coastal Waterflood System. Any excess water is then hauled by Hardin Houston Trucking to a commercial system, New Mexico Salt Water System, located off County Road 508, 10 miles west of Crossroads, New Mexico.

If you should have any further questions concerning this matter, please call us.

Very truly yours,

*Ernie Buttross*
