Wildcat  
(Field)

Chaves  
(County or Subdivision)

New Mexico  
(State or Territory)

The elevation of the derrick floor above sea level is 4166 ft. D.F.; 4159 G.L.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is intended to drill a 3600 foot San Andres test using rotary tools, setting 400 feet of 8-5/8" surface casing cemented to the surface and a 4-1/2" production string if production is indicated, cementing same to well above the possible pay zone using standard oil field practices.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company MAX COLL
