WELL STATUS: Shut-In

DATE S-I or T-A: 2-73

REASON: To balance cumulative injection volumes with new wells converted to injection in 1973

PLANS: Well is to remain S-I until cumulative injection volumes on the new injection wells approximate those of the SI injection wells. At that time the waterflood banks should be approximately equivalent and final analysis of the floodability of the project will be determined.

Expires 10/1/75
