(NOTE: Report results of multiple completion or Well Completion or Rec. Completion Report and Log form.)

20. THIS REPORT IS FOR THE USE OF COMPLETE OPERATIONS. Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and geologic points.

APOLLO ENERGY requests approval to continue current practice of testing wells by a portable well tester rather than using mostly "out of service" separator meters at each battery in the Cato San Andres Field.

Almost all wells in the Cato Field are stripper averaging 2-3 BOPD and some water. It has been APOLLO'S experience over the last 4½ years in this field, the well tests are more dependable & cost effective under the present system than the previous ones which I believe were not used in years (I suspect the tests were "boiler house").

CATO STORAGE SYSTEM II:
