Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

This is a Notice of Intention for plugging & abandonment of this test. The well has been drilled to a T.D. of 4050'. The Queen formation tested water and the lower San Andres shows very little porosity which also appears water bearing. No other water zones are indicated. It is proposed to set cement plugs as follows:

250'-350'	2590'-2690'
1150'-1050'	3700'-3800'

Mud will be spotted between plugs. Cement and mud to be pumped by Halliburton.
