13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this zone.)

We wish to amend the previously submitted Application for Permit to Drill the above referenced well as follows:

The well is currently plugged and abandoned. We plan to drill out plugs and clean well out with a 7 7/8" bit to 8000' (+/-500'), run 5 1/2" 15.5# K-55 casing and cement with 200 sx Class "H" cement. Pending approval from NM OCD we plan to kick off at that point and directionally drill a 4 3/4" hole to a TD approximately 300'-500' away from the original wellbore. We will run 2 7/8" N-80 tubing to TD and will cement the tubing in the hole back up to the 5 1/2" casing. The true vertical depth will be approximately 9950'.
