☐(NOTE: Report results of multiple completion on Well
Completion or Recompletion Report and Log form.)17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any
proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones perti-
nent to this work.)*

*This well was originally drilled to a TD of 10,620'. It was then plugged back to a PBTD of 4535' in the Lonesome San Andres and is currently producing oil from that zone.

Propose to clean out wellbore to approximately 4950' and complete non-productive Glorieta zone, open hole from 4584' to 4720' for salt water disposal purposes. Dual completion of the salt water disposal zone with the producing San Andres zone will be processed by separate filings.

18. I hereby certify that the foregoing is true and correct
