Re: 2-7/8" Tubingless Gas
Completion
Dalport Oil Corp. #1 Federal-5
NM 0478452
Sec. 5, 15S-30E
660' FN & EL
Chaves County, New Mexico

Dear Sir:

I am enclosing Federal form 42-R1425, "Application to Drill", dated December 8, 1974, and which specified that 4½" production casing would be run. As we are now contemplating running 2-7/8" production casing, we respectfully request approval by the District Supervisor of a tubingless completion since the following requirements of Rule 107-e are fulfilled:

- 1) TD will be 2250.
- 2) Well is not a wildcat, as there is a Queen gas completion in the NW¼ SW¼ Section 4, 3/4ths of a mile to the southeast.
- 3) No known corrosion or pressure problems.
- 4) Well is not a dual completion.
- 5) Tubing is 2-7/8".

Please advise if more information is necessary.

Yours very truly,

Leon M. Lampert
