

(3) RESIDENCES AND BUILDINGS - None within several miles

(4) ARROYOS, CANYONS, HILLS, ETC. - None

h. WELL SIGN - Should the well be a producer, a proper well sign will be placed at the well. If the well is a dry hole it will be plugged and abandoned with a marker at the surface.

i. OPEN PITS - Open pits will be fenced or guarded. The reserve pits will be plastic lined.

4. ROADS

a. EXISTING ROADS - Existing lease and ranch roads will be used to the west edge of Section #1. See Exhibit A

b. PLANNED ROADS - Only 660' of new road will be constructed in Section #1.

c. FENCES, GATES AND CATTLE GUARDS - A cattle guard will be placed where the road crosses the fence along the west side of Section #1.

5. TANK BATTERY - If productive, a tank battery will be located on the drilling pad.

6. LEASE PIPELINES

a. EXISTING - None

b. PLANNED - Should a discovery be made, it is possible that gathering line will be layed from all wells on the lease to a common tank battery.

7. WASTE DISPOSAL - All waste material from the drilling rig will be buried in the sludge pit. Produced water will be disposed of according legal requirements.

8. WATER SUPPLY - Water for drilling will be purchased from the surface owner.
