17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

Well was drilled to 9350', PB to 9326' and tested the Morrow Zone 9262-94' on 7-2-76, but did not produce from this zone. Well was recompleted to the above zone 7181-7202' and completed as a pumping oil well. In April 1978, the above perfs were squeezed off and the well returned to the Morrow where it produced as a gas well until September 1980. In February a bridge plug was set at 8950' and capped with 35' of cement and the well was abandoned by the operator. Current operator plans to plug the well when New Mexico Oil Conservation Commission furnishes the procedure.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
