

Pits will be filled and the location cleaned of all trash and junk to leave the wellsite in as aesthetically pleasing a condition as possible.

- B. Any unguarded pits containing fluids will be fenced until they have been filled.
- C. If the proposed well is non-productive, all rehabilitation and/or vegetation requirements of the Bureau of Land Management and the United States Geological Survey will be complied with and will be accomplished as expeditiously as possible. All pits will be filled and leveled within 90 days after abandonment.

11. OTHER INFORMATION.

- A. Topography: The proposed wellsite is located in an area of relatively level surface, with only minor variations.
- B. The topsoil at the wellsite is relatively hard, compacted sand.
- C. Flora and Fauna: The vegetation cover at the wellsite is moderately sparse, consisting of mesquite, desert flowers, bear grass and other grass, cactus, and miscellaneous weeds. The only wildlife observed were jackrabbits, but it is likely that other typical semi-desert wildlife inhabit the area.
- D. There are no houses or buildings in the vicinity of the wellsite. The nearest windmill is about 2 1/2 miles north of the location.
- E. There are no rivers, streams, lakes or ponds within several miles of the location.

12. OPERATOR'S REPRESENTATIVES.

- A. The field representatives responsible for assuring compliance with the approved surface use and operations plan are:

Eddie M. Mahfood  
Yates Petroleum Corporation  
207 South Fourth Street  
Artesia, New Mexico 88210  
Telephone: 505-746-3558 (office)  
505-746-4415 (home)

Leon Bergstorm  
Yates Petroleum Corporation  
207 South Fourth Street  
Artesia, New Mexico 88210  
Telephone: 505-746-3558 (office)  
505-748-1072 (home)
