Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

This test was drilled to a T.D. of 435' w/cable tools. At that point it was determined that no further hole could be drilled with a cable tool rig due to excessive caving and heaving. 13-3/8" casing was set @ 263' and 10-3/4" casing was set @ 400'. Neither string can be pulled due to cavings. A rotary drilling rig is being moved to this location. The 10" casing will be cemented and hole deepened to the original intended depth of 3100'. 4 1/2" casing will be set immediately above pay. A small cable tool will then drill in well.
