1. The first step is to identify the problem. This involves understanding the current situation and the goals that need to be achieved.

2. The second step is to analyze the problem. This involves breaking down the problem into smaller, more manageable parts.

3. The third step is to develop a plan. This involves determining the steps that need to be taken to solve the problem.

4. The fourth step is to implement the plan. This involves putting the plan into action.

5. The fifth step is to evaluate the results. This involves assessing the effectiveness of the solution and making any necessary adjustments.

Form 14: Needed only when location of well cannot readily be found, even from the name of the well. Information should be furnished when required by Federal or State agency orders.

Regions 15 and 19, 12 well is to be, or has been directionally drilled, give distances for subsurface geology. The estimated of the regional horizon projections are plotted

Item 39. Council appoints Federal or State regulators, or appropriate officials, concerning regulation of the production and distribution of

with the "good" side. It just means we
know the victory now. As for
the election material, we have a
plan. If our labor group is
strong, we will be strong. In fact,
the control will be unified.
