17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Murphy Operating Corporation proposes to set CIBP, test casing and temporarily abandon the subject well. This well does not produce sufficient volumes of oil and gas to be commercially viable. At some point in the future, this well may be used in a secondary recovery project, therefore, it is critical that this well not be plugged and abandoned.
