Form C-103 (Plug and Abandonment)

Page 2

quit bubbling after CIBP was set. Spotted cement plug #7, 10 sx. Class "C", at surface. Removed 8 5/8" bradenhead. Installed dry hole marker. Well plugged and abandoned 3-13-82. Mr. Tony Platsmire with New Mexico Oil Conservation Division directed and witnessed plugging operations. Location is in the process of being cleaned up. Form C-105 and log were filed 8-25-81.
