Roswell, New Mexico 88201

Gentlemen:

John S. Goodrich respectfully requests approval for off-lease measurement of gas production from his Lois Federal well No.1, a new gas well in the SE $\frac{1}{4}$ NW $\frac{1}{4}$ of Section 4, T.13 S., R.31 E., Chaves County, New Mexico, lease NM-015807.

This gas well is shut in at present because of no pipeline connection. Mr. Goodrich has filed an application with BLM for a R-O-W for a gas sales pipeline to connect this well to Cabot's existing gas gathering system in the area. When this R-O-W is approved, a 2-3/8" steel pipeline will be constructed from the Lois Federal No.1, lying alongside the access road, to the tie-in point to Cabot's pipeline just south of the Yates Federal AA well No.1 in the SE $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 4, as shown on the attached Exhibit "A".

The reason for this request is to permit the sale of gas from this shut-in gas well. Although the well has not been potentialled, it is estimated gas production will be about 500 MCF per day. Gas sold will be metered at the tie-in point to Cabot's line.

Approval of this application would be in the interest of conservation and would not result in reduced royalty or improper measurement of production.

If there are any questions concerning this application, or if any additional information is needed, please let me know.

APPROVED

(Orig. Sgd.) PETER W. CHESTER

DEC 5 1984

Sincerely,

Arthur R. Brown, Agent for
JOHN S. GOODRICH
