

Bureau of Land Management
September 20, 1984
Page 2

As requested ammended 9-329 forms for previous months which estimate gas volume vented will be submitted with August, 1984 form 9-329. Recent gas flow from these wells has occurred in "slugs" making accurate measurement difficult. For this reason estimates are based on original gas-oil ratios taken from the completion reports (9-330) previously submitted to your office.

Sincerely,

YATES DRILLING COMPANY

Toby L. Rhodes
Engineer
