Continued intermittent testing shows the well to be non-commercial in the present perforated zone. Pending approval from the working interest owners, we plan to perforate the interval 4217'-20' with 7 shots, 4231' with 3 shots, and 4243'-46' with 7 shots. Then treat with 2,000 gallons of acid, swab minimum until oil shows and put back on pump to test.
