Re: Off-Lease Measurement
of Gas Production

Gentlemen:

By approval of letter application dated April 17, 1986, John S. Goodrich was given approval for off-lease measurement of gas production from his Hondo Federal well No.1, a completed gas well in the SE $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 21, T.13 S., R.31 E., Chaves County, New Mexico, lease NM-080219. Such approval was needed because, in order to sell gas from this shut-in gas well, it would be necessary that Mr. Goodrich construct a gas sales pipeline from the Hondo Federal No.1 to Cabot's existing gas gathering system.

Since that time, however, it has been necessary to change the route for the gas sales pipeline and the tie-in point to Cabot's gathering system. The new route for the gas sales pipeline and the new tie-in point are shown on the attached Exhibit "A".

Accordingly, your approval is now respectfully requested for off-lease measurement of gas sold from the Hondo Federal well No.1 at the tie-in point to Cabot's pipeline in the NE $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 8, T.13 S., R.31 E., Chaves County, New Mexico, as shown as Point "A" on the attached Exhibit. No gas from any other well will be measured through this meter.

Approval of this application would be in the interest of conservation and would not result in reduced royalty or improper measurement of production.

If there are any questions concerning this application, or if any additional information is needed, please call me.

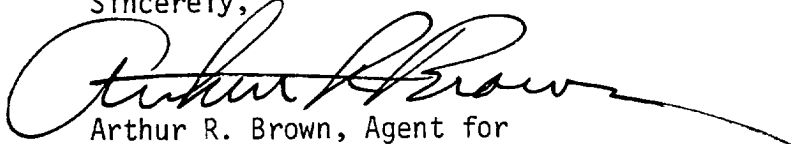

APPROVED
PETER W. CHESTER
