Gentlemen:

John S. Goodrich respectfully requests approval for off-lease measurement of gas production from his Hondo Federal well No.1, a recently completed shallow gas well in the SE $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 21, T.13 S., R.31 E., Chaves County, New Mexico, lease NM-080219.

This gas well is shut in at present because of no pipeline connection. Mr. Goodrich is filing applications with BLM and with the State for R-O-W's for construction and location of a gas sales pipeline to connect this well to Cabot's existing pipeline gathering system. After approval of the R-O-W's, a 2-3/8" O.D. and/or 2-7/8" O.D. steel pipeline will be constructed, as shown on the attached Exhibit "A", from the Hondo Federal well No.1 to the tie-in point to Cabot's pipeline at Point "E".

Gas sold will be metered at the tie-in point to Cabot's pipeline. * Estimated gas production, after connection to Cabot's pipeline is about 200 MCF per day.

Approval of this application would be in the interest of conservation and would not result in reduced royalty or improper measurement of production.

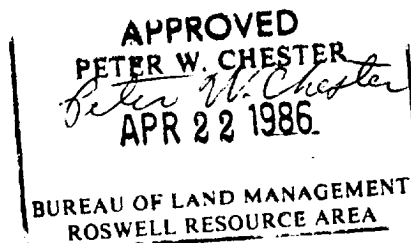

If there are any questions concerning this application, or if additional information is needed, please let me know.

* as per phone conversation w/Arthur Brown on 4/22/86 this will be only well through this meter
Peter W. Chester

Sincerely,

Arthur R. Brown
