Re: Middlebrook -3- No. 1
Section 3, T10S, R30E
Chaves County, New Mexico

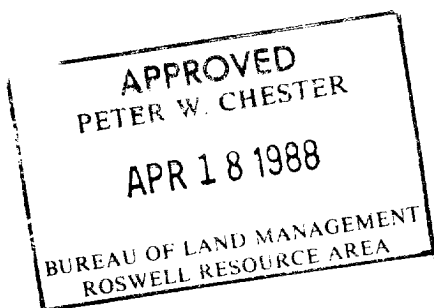

Gentlemen:

SWNE → Tom Brown, Inc. hereby requests approval for measuring and selling the gas produced from the Middlebrook -3- No. 1 off of the lease encompassing the subject well. The gas moves off of the Middlebrook lease and is delivered to a meter run operated by El Paso Natural Gas Company located in Section 9, T10S, R30E just off of the Cato Field road. The meter run serves to measure the gas and acts as the point-of-sale for the gas before the gas enters EPNG's main line.

This is the only well on the meter P.W.C.

El Paso transports the gas to the spot market where it is sold. El Paso measures the gas and provides TBI with a volume statement that is used for settlement purposes. TBI does not believe that the point of measurement and sales will change in the foreseeable future.

Any questions or comments should be directed to the undersigned at the letterhead address or (915)682-9715.

Sincerely,

TOM BROWN, INC.
