☐ Change of Plans
☐ New Construction
☐ Non-Routine Fracturing
☐ Water Shut-Off
☐ Conversion to Injection
☒ Dispose Water

(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Dakota proposes to use off lease water disposal on the Wakan Tanka Federal #4 located at 2080' FSL & 990' FWL of Sec 27, T13S R31E Chaves Co., NM. This Dispsal Well is operated by Dakota Resources. Produced fluid is pumped to Karankawa Federal heater treater where the oil & water are seperated. The water is then pumped to Wakan Tanka #4 water storage tank. This water is then injected down 2 7/8" tubing and into perforations from 2864' to 2876'. The permit number for the Wakan Tanka Federal SWD #4-L is SWD-427.

The produced water from the Karankawa Federal #1 has been disposed in this manner since initial production in March, 1994. The Karankawa Federal #1 averages between 60 - 80 bwpd.

14. I hereby certify that the foregoing is true and correct
