13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Dakota is proposing to vent 48 mcfd casing head gas from it's Karankawa Federal #1. This volume of gas was determined by using a 2" adjustable choke and back pressure valve. An attempt was made to market the gas, however, due to the high nitrogen content (63%) and the high cost to strip the nitrogen off, no purchasers were found.
