☐ Water Shut-Off
☐ Conversion to Injection
☐ Dispose Water

(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Dakota proposes to use off lease storage and measurement facilities which are currently existing and located in the SW/4 of Section 27, T-13-S, R-31-E, Chaves Co., NM. The oil would be leaving lease number NM-91906 and going to storage facilities located on lease number NM-080128. The storage facility is located in the NE/4 NW/4 of Section 34, T-13-S, R-31-E, Chaves County, New Mexico on the lease known as the Wakan Tanka Federal.

Oil and water produced from NM-91906 and transported by flowline to an existing 4' x 20' 3 phase heater-treater with water metered and transferred to the salt water disposal facility. Oil would be produced from heater-treater to a separate 210 BBL steel tank with locking devices for all valves and sold from this tank.

Production of this well into the above described facility will begin with BLM approval.

14. I hereby certify that the foregoing is true and correct

Signed

Sam M. Maphew
