13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

We propose construction of an electrical line to furnish power for operation of a newly-completed oil well. This line would extend from private surface onto BLM land and run along an access road for which ROW approval has already been obtained. An Archaeological Survey (Report #93-211) has been conducted and covered an area 50 ft from center of access road on each side. Total length of new line on BLM land would be 330' of 4 wire, 480 volt (#4 ASCR wire), 3 holes dug w/ auger, 2- 35' poles buried 1/2' below ground level and 1 anchor & guy wire. Service line to pumping unit motor would be ditched and buried.
