Date

OIL CONSERVATION COMMISSION,
Santa Fe, New Mexico.

Gentlemen:

Following is a notice of intention to do certain work as described below at the _____

Cooperative Producing Association State J Well No. 2 in NE/SW
Company or Operator Lease
of Sec. 6, T. 13S, R. 32E, N. M. P. M., Caprock Field.
Lea County.

FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

Intend to fish tubing, clean out to total depth

Approved _____, 19____
except as follows:

OIL CONSERVATION COMMISSION,
By Ray Gunkrough
Title _____

COOPERATIVE PRODUCING ASSOCIATION

Company or Operator

By

J. O. Denton, Jr.

Position

General Manager

Send communications regarding well to

Name

J. O. Denton, Jr.

Address

Cooperative Producing Ass'n. - Box 978Levelland, Texas

THEORY OF THE EARTH AND ITS HISTORY

CHAPTER I. THE EARTH

SECTION I. THE EARTH AS A WHOLE

The Earth is a sphere, and its surface is covered by water. The land is divided into continents and islands. The oceans are divided into seas and gulfs. The atmosphere is the layer of gas that surrounds the Earth. The hydrosphere is the layer of water that covers the Earth. The lithosphere is the layer of rock that makes up the Earth's crust.

SECTION II. THE EARTH'S INTERIOR

The Earth's interior is divided into three main layers: the crust, the mantle, and the core. The crust is the outermost layer, and it is made of rock. The mantle is the layer below the crust, and it is made of molten rock. The core is the innermost layer, and it is made of molten metal. The crust is divided into the continental crust and the oceanic crust. The mantle is divided into the upper mantle and the lower mantle. The core is divided into the outer core and the inner core.

The Earth's interior is hot, and the heat is caused by the decay of radioactive elements. The heat causes the rock in the mantle to flow, and this flow is what causes the Earth's magnetic field. The heat also causes the rock in the core to flow, and this flow is what causes the Earth's rotation.

The Earth's interior is also divided into smaller layers, and these layers are also made of different materials.

The Earth's interior is also divided into smaller layers, and these layers are also made of different materials.

The Earth's interior is also divided into smaller layers, and these layers are also made of different materials. The Earth's interior is also divided into smaller layers, and these layers are also made of different materials. The Earth's interior is also divided into smaller layers, and these layers are also made of different materials.

The Earth's interior is also divided into smaller layers, and these layers are also made of different materials. The Earth's interior is also divided into smaller layers, and these layers are also made of different materials. The Earth's interior is also divided into smaller layers, and these layers are also made of different materials.

The Earth's interior is also divided into smaller layers, and these layers are also made of different materials.
