Hobbs, New Mexico

Attention: Mr. R. F. Montgomery
Proration Manager

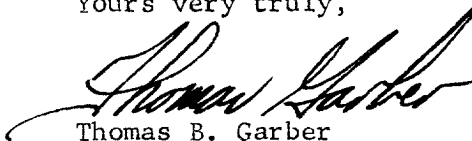

Gentlemen:

We have filed under separate cover, in triplicate, completed Form C-102 for our proposed plan of work to squeeze and reperforate the above named well. As approved by you, in our telephonic conversation of June 27, 1956, we have commenced this plan of operation.

Work over operations are necessary on this well, since water encroachment has drowned out production, and the well is now incapable of producing. We will attempt to squeeze off the water and reperforate higher in the section. We will run production test to determine the effectiveness of the water shut off.

If additional information is desired, please advise.

Yours very truly,

Thomas B. Garber
Division Engineer
