1. The first part of the paper is devoted to a general discussion of the problem of the origin of life. It is shown that the problem is one of the most important and most difficult in the history of science. The author discusses the various theories of the origin of life, from the spontaneous generation of life from non-living matter to the theory of the origin of life from pre-existing life.

2. The second part of the paper is devoted to a detailed discussion of the theory of the origin of life from pre-existing life. The author discusses the various theories of the origin of life from pre-existing life, from the theory of the origin of life from pre-existing life to the theory of the origin of life from pre-existing life. The author discusses the various theories of the origin of life from pre-existing life, from the theory of the origin of life from pre-existing life to the theory of the origin of life from pre-existing life.
