Stanolind Oil and Gas Company Lois Wingard  
(Company or Operator) (Lease)

Cactus Drilling Company, Well No. 12 in the SW  $\frac{1}{4}$  SE  $\frac{1}{4}$  of Sec. 24,  
(Contractor)

T. 12-S-R-37E, NMPM, Gladiola Pool, Lea County.

The Dates of this work were as follows: April 18, 1955 to April 20, 1955

Notice of intention to do the work ~~was~~ (was not) submitted on Form C-102 on \_\_\_\_\_, 19\_\_\_\_,  
(Cross out incorrect words)

and approval of the proposed plan ~~was~~ (was not) obtained.

## DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

Spudded 17-1/2" hole 4-17-55.

On April 18, 1955, we ran 287' of 13-3/8" casing set at 300' and cemented with 225 sacks mixed 8% gel followed by 100 sacks of neat circulated to surface. After WOC for 30 hours, tested casing with 200 psi for 30 minutes before and after drilling plug. No drop in pressure. Resumed drilling operation.

# Introduction

The purpose of this document is to provide a comprehensive overview of the project's objectives, scope, and deliverables. The project aims to develop a robust system that can handle large volumes of data and provide real-time analytics. The scope of the project includes the design, development, and deployment of the system. The deliverables include a detailed project plan, a functional prototype, and a final report.

The project is organized into several phases, each with specific tasks and milestones. The first phase is the initial planning and requirements gathering. This is followed by the design phase, where the system architecture is defined. The third phase is the development and testing of the system. The final phase is the deployment and maintenance of the system. Each phase has a set of deliverables that must be completed before moving on to the next phase.

The project team consists of several members, each with specific responsibilities. The project manager is responsible for overall project management and coordination. The system architect is responsible for the design of the system. The developers are responsible for the implementation of the system. The testers are responsible for the testing of the system. The deployment team is responsible for the deployment of the system.

The project is expected to be completed within a specified timeline. The project budget is also defined. The project risks are identified and mitigated. The project is monitored and controlled throughout its lifecycle. The project is evaluated at the end of its lifecycle to determine its success.
