We drilled this well to T.D. of 9894' and found it barren of any production we now wish to plug and abandon at this depth. We ran 281' of 13-3/8 casing cemented with 350 sacks of cement, circulated back to surface, also 4520' of 9-5/8 casing, cemented with 2000 sacks of cement, circulated back to surface. The hole will be filled with mud laden fluid, a 50' cement plug will be placed in the top of the 9-5/8 casing, after which it will be bull plugged. The cellar will be filled and the regulation marker placed over the well bore.
