(Date)

Gentlemen:

Following is a Notice of Intention to do certain work as described below at the **Cabot Carbon Company**

H. L. Lowe "B"

(Company or Operator)

Well No. **1-Devonian**

(Unit)

SE $\frac{1}{4}$ **SE** $\frac{1}{4}$ of Sec. **26**, T. **13-S**, R. **37-E**, NMPM, **King-Devonian** Pool

(40-acre Subdivision)

Lee

County.

FULL DETAILS OF PROPOSED PLAN OF WORK
(FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS)

This well is dually completed in the Devonian and Wolfcamp sections. Recently the Devonian completion began making a considerable amount of water. An analysis of the water indicated that the water was not similar to other Devonian waters in the area, but did resemble Wolfcamp water. It is thought that the water may be coming from perforations 10,214'-10,228' which were squeezed off with cement when the well was dually completed. We propose to drill out the permanent packer at 10,198' and locate the point of water entry. If the above mentioned perforations are leaking, then they will be isolated by setting a Baker Model "D" Packer above and below the perforations and dual equipment reinstalled. If the water is entering at some other point, shut off will be attempted by cement squeezing.
