Mr. R. F. Montgomery
New Mexico Oil Conservation Commission
P. O. Box 2045
Hobbs, New Mexico

Dear Sir:

Enclosed herewith is Form C-102, Miscellaneous Notices, setting out the procedure to be used in testing the Wolfcamp section in our H. L. Lowe "B" Well No. 1. If satisfactory production is indicated by the tests, then we propose to dually complete the well in the Wolfcamp and Devonian sections as permitted under New Mexico Oil Conservation Commission Order No. R-1126-A.

The well is currently producing from the Devonian section. We propose to take the well off production from the Devonian section and to file for allowable from the Wolfcamp section while conducting production tests. We will notify you when the work is begun and production is temporarily discontinued from the Devonian.

Very truly yours,

CABOT CARBON COMPANY
