OIL CONSERVATION COMMISSION
SANTA FE, NEW MEXICO

Midland, Texas
(Place)

9-25-64
(Date)

Gentlemen:

Following is a Notice of Intention to do certain work as described below at the **Cabot Corporation**

Howard Fleet Well No. **1** in **I** (Unit)
(Company or Operator) Lease
NE **SE** **35** T. **13-S** R. **37-E** NMPM, **King-Devonian** Pool
(40-acre Subdivision) 1/4 of Sec.
Lea County.

FULL DETAILS OF PROPOSED PLAN OF WORK
(FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS)

This well is currently completed as a dual producer from the Devonian and Pennsylvanian zones. However, it has been produced as a single completion from the Devonian for some three years, with the Pennsylvanian zone isolated by packers. Due to an increase in water production and a decrease in oil production from the Devonian section, we propose to temporarily abandon the Devonian zone by setting a bridge plug at approximately 11,050', and producing from the Pennsylvanian zone through the present perforations 10,708'-10,733', 10,972'-10,994' and 11,012'-11,027'.

Approved *ft*, 19____
Except as follows:

Approved
